

TABLE PURSUANT TO CP6.41# - Harvest Method (04/2003)

Harvest Units	Harvest Method
ALL	<p data-bbox="516 380 1377 527">Boughs from Noble fir, Douglas fir, Western White Pine, Spruce, and Cedar may be harvested following the guide below. Harvest unit boundaries are designated on the ground with orange tree marking paint and orange cards.</p> <p data-bbox="516 558 703 585">Description:</p> <ol data-bbox="565 617 1377 1604" style="list-style-type: none"> <li data-bbox="565 617 1377 737">1. No boughs will be removed from the top 50 percent of the live crown on any tree or from the top six whorls of branches, whichever is greater. <li data-bbox="565 768 1377 888">2. Harvesting of bough branches not to exceed 1/3 of the total branch length. Cut must be made immediate to the outside remaining branchlet to ensure future bough development. <li data-bbox="565 919 1377 1010">3. Boughs may be cut with clippers or pruning saws. Axes and hatchets will not be used for cutting. Climbing spurs are not allowed. <li data-bbox="565 1041 1377 1131">4. Bough removal will be by hand carrying to existing rocked roads unless otherwise agreed upon. <li data-bbox="565 1163 1377 1220">5. Harvest height will be determined from the uphill side of the tree. <li data-bbox="565 1251 1377 1308">6. No boughs shall be cut from trees less than six feet tall. <li data-bbox="565 1339 1377 1430">7. Harvesting of boughs would be restricted within 50 feet of any trail, streams, ponds, lakes, wetlands, and meadows. <li data-bbox="565 1461 1101 1488">8. Topping of trees is prohibited. <li data-bbox="565 1520 1377 1604">9. Exceptions are, Western White Pine trees are required to be pruned and cut flush to the bole of the tree.
